

ACTIW LOADPLATE®
**- THE MAGIC OF AUTOMATED
CONTAINER AND TRAILER LOADING**

Actiw LoadPlate is a fast and proven, one shot loading solution for regular, non-modified cargo spaces. Stop losing money. Get payback on loading with LoadPlate.

ACTIW LOADPLATE

THE SAFEST, MOST EFFICIENT AND ROBUST WAY TO LOAD YOUR CARGO UNDAMAGED

LoadPlate is a one shot automated loading solution for regular, non-modified cargo space such as sea containers, trucks and trailers. LoadPlate is especially suitable for loading difficult cargo that is hard to containerize, is easily damaged or usually requires special

shipping units such as open top or flatrack containers. The unloading can be done in one pull, working on standard platforms with standard equipment, when the cargo is prepared for unloading with Activ Load-Strip, sling or other type of unloading preparation.

INDISPUTABLE BENEFITS THROUGH AUTOMATED LOADING

Using LoadPlate improves safety and time management, reduces product damages and also labor, machinery and shipping costs.

LoadPlate has proven its efficiency in loading sawn timber and timber products, pulp bales, steel plates, tubes, profiles or project goods of varying sizes and lengths.

Labor

Manual

- 2–3 forklifts and forklift drivers per container
- Container ready and loaded in 240 minutes

LoadPlate

- 1 forklift and forklift driver per container
- Container ready and loaded in 20 minutes

Machinery and Investments

- 1 reach stacker + 2–3 forklifts per container
- Containers must be lifted off the trailer
- Special equipment and add-ons often needed

- 1 forklift per container
- Container can be loaded on the trailer
- Minimized amount of extra equipment and costs

We offer customer care from preventive maintenance to training.

Shipping and Product Damages

- Each forklift contact increases the risk of damage
- The average amount of damages: 1 damage per week (52 per year)
- The average costs of the damages: 5000 € per damage

- Minimized risk of product damages
- Significantly reduced amount of claims
- The average amount of damages: 1 damage per year

Health and Safety

- High safety risk when working inside the container
- Injuries and damage occurring from collisions, falling, pinching etc.

- Load preparation performed more safely in the open space
- Automation leaves no room for human error

**1,4 M€
ANNUAL
SAVINGS.**

* The calculations are based on real production volumes in customer company in 2014.

LOADPLATE CONFIGURATIONS

- DESIGNED FOR DIFFERENT LOADING NEEDS

LoadPlate

For loading all types of standard containers (20', 40' and 45') and varying trailer and truck lengths up to 13,6 meters. It is designed to load one container at a time.

LoadPlate Multi

Fits environments with heavy container traffic, where container handling is done in different sequence from the load forming and loading operations.

Unloading Table

Perfect for quick unloading from standard cargo space

Read more about configurations and add-ons from our web page!

All LoadPlates are premounted and quick to set up

Many companies have chosen Actiw LoadPlate loading system and gained real monetary effects by that decision. Actiw LoadPlate can demonstrate proven efficiency in loading timber, steel plates, pipes, pulp, construction materials and other complex cargo.
